FDD Abstract of [redacted]

25X1A

RAILROAD SITUATION REPORTS ON THE WUSTERMARK AREA (11 pp; German, English) [redacted]

25X1C

25X1X [redacted]

The document is a [redacted] report by Reichsbahnamt 5 (Railroad Office no 5) of the Deutsche Reichsbahn (German Railroads). 25X1

The first three pages, dated 3 Feb 1951, give the monthly report for Jan 1951 on traffic operations. It lists the trackage of the Reichsbahnamt Berlin 5 as 502 km plus 9 km of private railroad trackage. The area includes 109 stations. There are further figures on car loadings (6,201) and unloadings (16,548), broken down by commodities; on movements of rolling stock, inventories of coal on hand at the various subdivisions, number of cars in need of repair and repaired; and on maintenance of lines.

Pages 4 through 7, dated 5 Feb 1951, give information on operation and repair of rolling stock (72 locomotives in operation and 39 in repair). Lack of a number of locomotive spare parts is noted.

Pages 8 and 9, dated 29 Jan 1951, list bridge projects for 1951 by total cost and 1951 appropriation.

Pages 10 and 11 give a none too exact English translation of pages 8 and 9, with several items which are not included in pages 8 and 9.
